

The GutterDome Difference

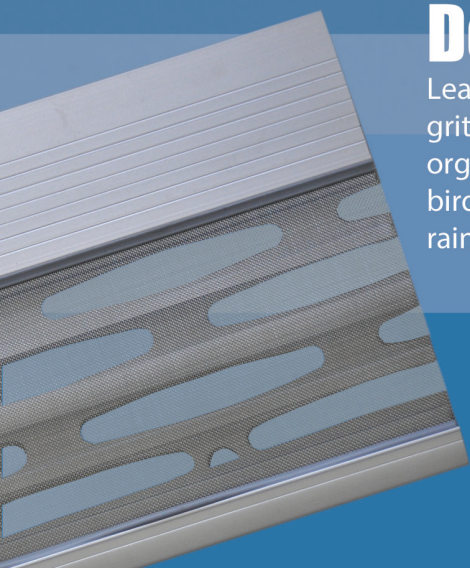

GutterDome is a permanent solution to an annual problem™. Each year, countless hours are spent cleaning clogged and debris filled rain gutters. This is a time consuming and dangerous task which is eliminated by installing GutterDome gutter guard. Our cutting edge siphoning technology and innovatively designed gutter guard prevents clogged rain gutters and eliminates gutter cleaning for all-time™.

From Our Concept

- Plain weave surgical grade stainless steel wire mesh prevents debris from entering your rain gutter system
- Installs on majority of rain gutters (4" - 5" or 6" - 7" width) including curved, fascia, half round, K-style and ogee
- Installs on all roof types including cedar shakes, composition shingles, flat tile, metal, Spanish tile and stone coated steel
- Fastens to the front lip of your existing rain gutters with self-drilling screws that are Stalgard® coated
- Durable surface coating adheres to AAMA standards, is environmentally responsible, long lasting, low maintenance, scratch resistant and provides tough performance

To Your Home

Deter.

Leaves, pine needles, roof grit, seed pods, small organic matter and whirly birds from entering your rain gutter system.

Prevent.

The need for annual rain gutter cleaning. For purely aesthetic reasons, simply brush or blow the debris from the top of the rain gutter guard.

Relax.

With the convenience and peace of mind that your rain gutters are protected and free of debris and obstructions year round.

Professional installations are performed by GutterDome Authorized Dealers. For more information, logon to www.GutterDome.com or call toll free **877.987.4888**
